

Bruce Hebets

Mr. Hebets' career in healthcare has spanned more than two decades. Mr. Hebets began his career with the San Diego Harbor Police, rising to the rank of Sergeant during his tenure. After 14 years on patrol, he set out on a new career focused on health care in underserved communities.

Mr. Hebets joined Borrego Health in 2004 as the Chief Executive Officer and under his leadership, Borrego Health grew from a single site of care with 17 employees to one of the largest Federally Qualified Health Center systems with 25 sites, five mobile units and over 1,400 employees.

During Mr. Hebets' tenure, Borrego Health has been recognized as a pioneer in the FQHC movement. Ten of the sites of care have received National Committee for Quality Assurance recognition as Patient Centered Medical Homes, meeting level 3 standards, the highest possible accreditation. Borrego Health has the largest medical residency program of any health center in California with over 150 residents in training. And the health center has the largest partnership with private dental providers in California providing basic dental as well as advanced service to low income individuals that would not otherwise be available in the community.
